

Important Questions

1	What are the different types of teeth?
2	What are the functions of the different types of teeth?
3	What is a food chain?
4	What is a food web?
5	What is a producer/predator/prey?
6	How does the digestive system work?

Key Skills

1	To identify parts of the human digestive system and explain their function.
2	To observe and draw conclusions about different appearance and functions of human teeth and the differences between the teeth of carnivores and herbivores.
3	To produce simple food chains and food webs to demonstrate the roles of each organism within a habitat and their interdependence.

Working Scientifically

1	Ask relevant questions and use different types of scientific enquiries to answer them
2	Gather evidence and record findings using simple scientific language drawings, labelled diagrams etc
3	Identify differences, similarities or changes related to simple scientific ideas and processes

Key Vocabulary

1	Molars	Teeth that are used for grinding and mashing.
2	Canines	Teeth that are used for holding prey and for cutting into meat.
3	Incisors	Teeth that are used for snipping and nibbling.
4	Herbivore	An organism that only eats plants.
5	Carnivore	An animal that only eats meat.
6	Omnivore	An animal that eats both plants and meat.
7	Predator	An animal that naturally preys on others (that eats other animals)
8	Prey	An animal that is hunted and killed by another for food
9	Producer	Is an organism, either a green plant or bacterium, which is part of the first level of a food chain.
10	Food chain/Web	a series of organisms each dependent on the next as a source of food.
